Index to Volume 30

2000 Volume 30, Number 1 January

REVIEWS

D.W. Hadley, W.L. Dolch, S. Diamond: On the occurrence of hollow-shell hydration grains in hydrated cement paste **1**

PAPERS

H. El-Didamony, K.A. Khalil, M.S. El-Attar: Physiochemical characteristics of fired clay-limestone mixes **7**

I.K. Cisse, M. Laquerbe: Mechanical characterisation of filler sandcretes with rice husk ash additions. Study applied to Senegal **13**

S.P. Pandey, R.L. Sharma: The influence of mineral additives on the strength and porosity of OPC mortar **19**

A. Ammouche, D. Breysse, H. Hornain, O. Didry, J. Marchand: A new image analysis-technique for the quantitative assessment of microcracks in cement-based materials **25**

B. Gérard, J. Marchand: Influence of cracking on the diffusion properties of cement-based materials. Part I: Influence of continuous cracks on the stead-state regime **37**

D. Li, X. Wu, J. Shen, Y. Wang: The influence of compound admixtures on the properties of high-content slag cement **45**

C. Shi, R.L. Day: Pozzolanic reaction in the presence of chemical activators. Part I: Reaction kinetics **51**

Y. Xu, D.D.L. Chung: Effect of sand addition on the specific heat and thermal conductivity of cement **59**

C.X. Qian, P. Stroeven: Development of hybrid polypropylene-steel fibre-reinforced concrete **63**

C. Cao, W. Sun, H. Qin: The analysis on strength and fly ash effect of roller-compacted concrete with high volume fly ash **71**

X. Cheng, J. Chang, L. Lu, F. Liu, B. Teng: Study of Ba-bearing calcium sulphoaluminate minerals and cement **77**

M. Mainguy, C. Tognazzi, J.-M. Torrenti, F. Adenot: Modelling of leaching in pure cement paste and mortar **83**

Y. Shao, T. Lefort, S. Moras, D. Rodriguez: Studies on concrete containing ground waste glass **91**

H.M. Jennings: A model for the microstructure of calcium silicate hydrate in cement paste **101**

0008-8846/99/$ – see front matter © 2001 Elsevier Science Ltd. All rights reserved.
PII: S0008-8846(00)00487-7

T. Bing, M.D. Cohen: Does gypsum formation during sulfate attack on concrete lead to expansion? **117**

P.S. Mangat, F.J. O'Flaherty: Influence of elastic modulus on stress redistribution and cracking in repair patches **125**

M.A. Trezza, A.N. Scian: Burning wastes as an indusrial resource. Their effect on Portland cement clinker **137**

J. Zelić, R. Krstulović, E. Tkalčec, P. Krolo: The properties of Portland cement-limestone-silica fume mortars **145**

P.M. Zisopoulos, M.D. Kotsovos, M.N. Pavlovic: Deformational behaviour of concrete speciments in uniaxial compression under different boundary conditions **153**

DISCUSSIONS

J. Skalny, I. Odler, F. Young: Discussion of the paper "Sulfate attack," or is it? by W.G. Hime and B. Mather **161**

W.G. Hime, B. Mather: Reply to the discussion of the paper "Sulfate attack," or is it? **163**

NEWS ITEMS

2000 Volume 30, Number 2 February

IN MEMORIAM

H.F.W. Taylor: Alice Elizabeth Moore, 1921–1999 **169**

PAPERS

S. ORAK: Investigation of vibration damping on polymer concrete with polyester resign **171**

S. Gomes, M. François: Characterization of mullite in silicoaluminous fly ash by XRD, TEM, and ^{29}Si MAS NMR **175**

S. Kurtz, P. Balagaru: Postcrack creep of polymeric fiber-reinforced concrete in flexure **183**

E.M. Schulson, I.P. Swainson, T.M. Holden, C.J. Korhonen: Hexagonal ice in hardened cement **191**

K. Yamada, T. Takahashi, S. Hanehara, M. Matsuhisa: Effects of the chemical structure on the properties of polycarboxylate-type superplasticizer **197**

M. Frías, M.I. Sánchez de Rojas, J. Cabrera: The effect that the pozzolanic reaction of metakaolin has on the heat evolution in metakaolin-cement mortars **209**

O. Truck, J.P. Ollivier, M. Carcassès: A new way for determining the chloride diffusion coefficient in concrete from steady state migration test **217**

Z. Lu, X. Zhou: The waterproofing characteristics of polymer sodium carboxymethyl-cellulose **227**

B.A. Clark, P.W. Brown: The formation of calcium sulfoaluminate hydrate compounds. Part II **233**

Y. Xu, D.D.L. Chung: Reducing the drying shrinkage of cement paste by admixture surface treatments **241**

Y.N. Chan, X. Luo, W. Sun: Compressive strength and pore structure of high-performance concrete after exposure to high temperature up to 800°C **247**

M. Kuroda, T. Watanabe, N. Terashi: Increase of bond strength at interfacial transition zone by the use of ash fly **253**

M. El-Hawary, H. Al-Khaiat, S. Fereig: Performance of epoxy-repaired concrete in a marine environment **259**

M.Y.A. Mollah, W. Yu, R. Schennach, D.L. Cocke: A Fourier transform infrared spectroscopic investigation of the early hydration of Portland cement and the influence of sodium lignosulfonate **267**

P. Yan, W. Yang: The cementitious binder derived with fluorogypsum and low quality of fly ash **275**

H. Akgün, J.J.K. Daemen: Influence of degree of saturation on the borehole sealing performance of an expansive cement grout **281**

V.G. Papadakis: Effect of supplementary cementing materials on concrete resistance against carbonation and chloride ingress **291**

H. Kada-Benameur, E. Wirquin, B. Duthoit: Determination of apparent activation energy of concrete by isothermal calorimetry **301**

G. Renaudin, J.-P. Rapin, B. Humbert, M. François: Thermal behavior of the nitrated AFm phase $Ca_4Al_2(OH)_{12}(NO_3)_2{\cdot}_4H_2O$ and structure determination of the intermediate hydrate $Ca_4Al_2(OH)_{12}(NO_3)_2{\cdot}2H_2O$ **307**

E. Soudée, J. Péra: Mechanism of setting reaction in magnesia-phosphate cements **315**

COMMUNICATIONS

X. Luo, D.D.L. Chung: Concrete-concrete pressure contacts undr dynamic loading, studied by contact electrical resistance measurement **323**

S. Wen, D.D.L. Chung: Enhancing the vibration reduction ability of concrete by using steel reinforcement and steel surface treatments **327**

DISCUSSIONS

B. Mather: Discussion of the paper "Durability of the hydrated limestone-silica fume Portland cement mortars under sulphate attack" by J. Zelić R. Zelić Krstulović, E. Tkalčec, and P. Krolo **331**

J. Zelić, R. Zelić Krstulović, E. Tkalčec, P. Krolo: Reply to the discussion of the paper "Durability of the hydrated limestone-silica fume Portland cement mortars under sulphate attack **333**

NEWS ITEMS

2000 Volume 30, Number 3 March

PAPERS

T. Ramlochan, M. Thomas, K.A. Gruber: The effect of metakaolin on alkali-silica reaction in concrete **339**

S. Kumar: Influence of water quality on the strength of plain and blended cement concretes in marine environments **345**

C.F. Mora, A.K.H. Kwan: Sphericity, shape factor, and convexity measurement of coarse aggregate for concrete using digital image processing **351**

J.J. Beaudoin, B. Tamtsia, J. Marchand, H.R. Myers: Solvent exchange in partially saturated and saturated microporous systems: Length change anomalies **359**

M.M. Shoaib, M.M. Balaha, A.G. Abdel-Rahman: Influence of cement kiln dust substitution on the mechanical properties of concrete **371**

X. Luo, W. Sun, S.Y.N. Chan: Effect of heating and cooling regimes on residual strength and microstructure of normal strength and high-performance concrete **379**

S. Wang, C. Vipulanandan: Solidification/stabilization of Cr(VI) with cement: Leachability and XRD analyses **385**

L. Yan, C.H. Jenkins, R.L. Pendleton: Polyolefin fiber-reinforced concrete composites: Part I. Damping and frequency characteristics **391**

L. Yan, C.H. Jenkins, R.L. Pendleton: Polyolefin fiber-reinforced concrete composites: Part II. Damping and interface debonding **403**

P.W. Brown, A. Doerr: Chemical changes in concrete due to the ingress of aggressive species **411**

Z.P. Bažant, A. Steffens: Mathematical model for kinetics of alkali-silica reaction in concrete **419**

C.-K. Park: Hydration and solidification of hazardous wastes containing heavy metals using modified cementitious materials **429**

D. Anderson, A. Roy, R.K. Seals, F.K. Cartledge, H. Akhter, S.C. Jones: A preliminary assessment of the use of an amorphous silica residual as a supplementary cementing material **437**

C.S. Poon, L. Lam, Y.L. Wong: A study on high strength concrete prepared with large volumes of low calcium fly ash **447**

N. Narayanan, K. Ramamurthy: Microstructural investigations on aerated concrete **457**

C.-M. Aldea, F. Young, K. Wang, S.P. Shah: Effects of curing conditions on properties of concrete using slag replacement **465**

M. Öner: A study of intergrinding and separate grinding of blast furnace slag cement **473**

V. Pavlík: Effect of carbonates on the corrosion rate of cement mortars in nitric acid **481**

COMMUNICATION

C. Hall, S.L. Colston, A.C. Jupe, S.D.M. Jacques, R. Livingston, A.O.A. Ramadan, A.W. Amde, P. Barnes: Non-destructive tomographic energy-dispersive diffraction imaging of the interior of bulk concrete **491**

TECHNICAL NOTE

N. Ay, M. Ünal: The use of waste ceramic tile in cement production **497**

DISCUSSIONS

S. Chatterji: A discussion of the paper "The alkali-silica reaction. The surface charge density of silica and its effect on expansive pressure" by F.A. Rodrigues, P.J.M. Monteiro, and G. Sposito **501**

F.A. Rodrigues, P.J.M. Monteiro, G. Sposito: Reply to the discussion of the paper "The alkali-silica reaction: The surface charge density of silica and its effect on expansive pressure" **503**

BOOK REVIEW

J. Skalny: Ettringite-the sometimes host of destruction; B. Erlin (Ed.) **505**

NEWS ITEMS **507**

KEY WORDS **510**

2000 Volume 30, Number 4 April

PAPERS

T. Sebök, O. Stránel: Relationships between the properties of ligninsulphonates and parameters of modified samples with cement binders: Part IV. Influence of sulphonated compounds and sulphonation characteristics on the properties of mortar samples **511**

N.P. Luxán, R. Sotolongo, F. Dorrego, E. Herrero: Characteristics of the slags produced in the fusion of scrap steel by electric arc furnace **517**

R. Vocka, C. Gallé, M. Dubois, P. Lovera: Mercury intrusion porosimetry and hierarchical structure of cement pastes: Theory and experiment **521**

D.W. Hobbs, M.G. Taylor: Nature of the thaumasite sulfate attack mechanism in field concrete **529**

E.W. Hansen, H.C. Gran, Y. Machabée: FLR technique exchange of methanol/ fluorescent dye with water in water-saturated cement paste examined by NMR **535**

J. Payá, J. Monzó, M.V. Borrachero, E. Peris-Mora, F. Amahjour: Mechanical treatment of fly ashes. Part IV. Strength development of ground fly ash-cement mortars cured at different temperatures **543**

A. Guerrero, S. Goñi, A. Macías, M.P. Luxán: Effects of the starting fly ash on the microstructure and mechanical properties of fly ash-belite cement mortars **553**

M. Frías, J. Cabrera: Pore size distribution and degree of hydration of metakaolin-cement pastes **561**

M. Singh, M. Garg: Making of anhydrite cement from waste gypsum **571**

G. Prokopski, J. Halbiniak: Interfacial transition zone in cementitious materials **579**

J.M. Torrents, T.O. Mason, E.J. Garboczi: Impedance spectra of fiber-reinforced cement-based composites: A modeling approach **585**

M.C. Nataraja, N. Dhang, A.P. Gupta: Toughness characterization of steel fiber-reinforced concrete by JSCE approach **593**

N. Su, Y.-H. Wu, C.-Y. Mar: Effect of magnetic water on the engineering properties of concrete containing granulated blast-furnace slag **599**

C. Shi, R.L. Day: Pozzolanic reaction in the presence of chemical activators: Part II. Reaction products and mechanism **607**

M. Castellote, C. Andrade, C. Alonso: Electrochemical removal of chlorides: Modelling of the extraction, resulting profiles and determination of the efficient time of treatment **615**

J. Monteny, E. Vincke, A. Beeldens, N. De Belie, L. Taerwe, D. Van Gemert, W. Verstraete: Chemical, microbiological, and in situ test methods for biogenic sulfuric acid corrosion of concrete **623**

C. Monticelli, A. Frignani, G. Trabanelli: A study on corrosion inhibitors for concrete application **635**

COMMUNICATIONS

X. Lu, F. Yuan: Breakdown voltage and transition zone of concrete **643**

X. Fu, W. Hou, C. Yang, D. Li, X. Wu: Studies on Portland cement with large amount of slag **645**

D.-M. Bontea, D.D.L. Chung, G.C. Lee: Damage in carbon fiber-reinforced concrete, monitored by electrical resistance measurement **651**

S. Wen, D.D.L. Chung: Seebeck effect in steel fiber reinforced cement **661**

DISCUSSIONS

P.E. Grattan-Bellew: A discussion of the paper "elayed ettringite formation in heat-cured Portland cement mortars" by R. Yang, C.D. Lawrence, C.J. Lynsdale, J.H. Sharp **665**

R. Yang, C.D. Lawrence, C.J. Lynsdale, J.H. Sharp: Reply to the discussion by P.E. Grattan-Bellew of the paper "Delayed ettringite formation in heat-cured Portland cement mortars" **667**

S. Chatterji: A discussion of the paper "Crystallisation in pores" by G.W. Scherer **669**

G.W. Scherer: Reply to the discussion by S. Chatterji of the paper "Cystallization in pores" **673**

NEWS ITEMS **677**

2000 Volume 30, Number 5 May

PAPERS

G. Xu, J.J. Beaudoin, C. Jolicoeur, M. Pagé: The effect of a polynaphthalene sulfonate superplasticizer on the contribution of the interfacial transition zone to the electrical resistivity of mortars containing silica and limestone fine aggregate **683**

R. Krstulovic, P. Dabic: A conceptual model of the cement hydration process **693**

L. Jiang, B. Lin, Y. Cai: A model for predicting carbonation of high-volume fly ash concrete **699**

V. Bonavetti, H. Donza, V. Rahhal, E. Irassar: Influence of initial curing on the properties of concrete containing limestone blended cement **703**

V.S. Harutyunyan, E.S. Abovyan, P.J.M. Monteiro, V.P. Mkrtchyan, M.K. Balyan: Microstrain distribution in calcium hydroxide present in the interfacial transition zone **709**

Z. Agioutantis, E. Chatzopoulou, M. Stavroulaki: A numerical investigation of the effect of the interfacial zone in concrete mixtures under uniaxial compression: The case of the dilute limit **715**

N. Gowripalan, V. Sirivivatnanon, C.C. Lim: Chloride diffusivity of concrete cracked in flexure **725**

G.V. Guinea, G. Hussein, M. Elices, J. Planas: Micromechanical modeling of brick-masonry fracture **731**

H.Y. Qasrawi: Concrete strength by combined nondestructive methods: Simply and reliably predicted **739**

L. Lam, Y.L. Wong, C.S. Poon: Degree of hydration and gel/space ratio of high-volume fly ash/cement systems **747**

M. O'Farrell, S. Wild, B.B. Sabir: Resistance to chemical attack of ground brick–PC mortar: Part II. Synthetic seawater **757**

S. Erdogdu: Compatibility of superplasticizers with cements different in composition **767**

R. Yang, N.R. Buenfeld: Microstructural identification of thaumasite in concrete by backscattered electron imaging at low vacuum **775**

A. Peled, A. Bentur: Geometrical characteristics and efficiency of textile fabrics for reinforcing cement composites **781**

F. Collins, J.G. Sanjayan: Cracking tendency of alkali-activated slag concrete subjected to restrained shrinkage **791**

Z. Mei, D.D.L. Chung: Effects of temperature and stress on the interface between concrete and its carbon fiber epoxy-matrix composite retrofit, studied by electrical resistance measurement **799**

C. Shi, J.A. Stegemann: Acid corrosion resistance of different cementing materials **803**

M.F. Petrou, K.A. Harries, F. Gadala-Maria, V.G. Kolli: A unique experimental method for monitoring aggregate settlement in concrete **809**

E.M. Gartner, K.E. Kurtis, P.J.M. Monteiro: Proposed mechanism of C-S-H growth tested by soft X-ray microscopy **817**

COMMUNICATIONS

N.M. Agyei, C.A. Strydom, J.H. Potgieter: An investigation of phosphate ion adsorption from aqueous solution by fly ash and slag **823**

X. Zhang, J. Han: The effect of ultra-fine admixture on the rheological property of cement paste **827**

DISCUSSIONS

E.F. Irassar: A discussion of the paper "Durability of the hydrated limestone-silica fume Portland cement mortars under sulphate attack" by J. Zelić, R. Krstulović, E. Tkalčec, and P. Krolo **831**

J. Zelić, R. Krstulović, E. Tkalčec, P. Krolo: Reply to the discussion by E.F. Irassar of the paper "Durability of the hydrated limestone–silica fume Portland cement mortars under sulphate attack" **833**

M.N. Haque: A discussion of the paper "Influence of the superplasticizer, plasticizer and silica fume on the drying shrinkage of high-strength concrete subjected to hot-dry field conditions" by S.H. Alysayed **835**

BOOK REVIEW

J. Skalny: Eminent Civil Engineers — Their 20th Century Life and Times; D. Doran (Ed.) **837**

NEWS ITEMS **839**

2000 Volume 30, Number 6 June

PAPERS

R. Piltner, P.J.M. Monteiro: Stress analysis of expansive reactions in concrete **843**

A.R. Brough, A. Atkinson: Automated identification of the aggregate–paste interfacial transition zone in mortars of silica sand with Portland or alkali-activated slag cement paste **849**

P.D. Tennis, H.M. Jennings: A model for two types of calcium silicate hydrate in the microstructure of Portland cement pastes **855**
